ALUMINUM FENCING SYSTEM

TABAL is a company with a long history and tradition dating back to 1990. The history began with the production of license plates in a small plant in Lublin. The company quickly gained recognition and a position on the market by using innovative production methods. Continuous development and investment in expanding production allowed the company to establish new branches in Radom, Zamość, Siedlce and Olsztyn. Cooperation with large brands on the European market has opened up new development prospects for TABAL. Currently, TABAL supplies semi-finished products made of aluminum, stainless steel, construction materials, aluminum structures, CNC machining services and complete products. Among them, it offers boards and fences in Techfence and original Alufence system, as well as aluminum, stainless steel, metal sheets, stainless steel fittings, plastics and gratings.

TABAL is successful on the market, winning prestigious awards. Only in 2024, we were awarded such distinctions as " Teraz Polska" Emblem and "Forbes Diamonds". These distinctions are proof of the highest quality of the offered products and services and an innovative approach to business. "Teraz Polska" Emblem emphasizes the company's commitment to providing solutions at the highest level that meet the expectations of even the most demanding customers. The "Forbes Diamonds" are proof of the dynamic development and excellent financial condition of TABAL. These awards confirm that the company consistently achieves success, building its strong market position.

TAB'AL®
PRIME ALUMINIUM SYSTEM

The innovative and modern PRIME ALUMINUM SYSTEM construction system was created in Poland, more precisely in Lublin - the capital of the Lublin province. It is characterized by modularity, versatility and diversity, thanks to which it fits the needs of today's customers, meeting the generally accepted standard. Welded connections were replaced by screwed connections, which gives the entire structure slimness and elegance and allows the fence to be assembled element by element directly on the construction site, without the use of specialist tools. The construction material, aluminum, makes the structure durable, stable, maintenance-free and environmentally friendly. In our offer you will find comprehensive solutions for aluminum fences - segments, posts, double gates and sliding gates with accessories. We also offer additional elements such as a multimedia post, a mailbox post or garbage enclosures. We are convinced that our modern aluminum fencing system will add character to any property and will meet the expectations of even the most demanding customers. We provide full service - we design, install, advise on the choice of fence, provide accessories and deliver on time.

Basic elements of the system

SEGMENT   DOUBLE GATE   POST   WICKET GATE

SEGMENT   SLIDING GATE   WICKET GATE   SEGMENT   ANCHORED POST

Selected patterns

HORIZONTAL
- p. 14

BLADE
- p. 30

VERTICAL
- p. 26

CURTAIN
- p. 34

DECORATIVE
- p. 38

Additional elements of the system

Multimedia post - p. 42

Mailbox post - p. 44

Garbage enclosure - p. 45

Wicket roofing - p. 46

LED lighting - p. 47

The PRIME ALUMINIUM SYSTEM makes it possible to create any combinations of aluminium profiles with heights ranging from 30 to 180 mm. Given the wide selection of colours, users can create individual designs to highlight the aesthetic qualities of their home and garden, while enjoying the desirable level of privacy.

| 30 mm x 25 mm |
| 60 mm x 25 mm |
| 90 mm x 25 mm |
| 120 mm x 25 mm |
| 150 mm x 25 mm |
| 180 mm x 25 mm |

Advantages of our fences

How we work

10-year product warranty

10-year WARRANTY

VERTICAL fence is a classic model in a modern version, characterized by a vertical arrangement of profiles. We are able to make a vertical fence for most of the available horizontal filling patterns (CLASSIC, SLIM, MODULAR, etc.). In combination with a wide range of RAL colors and wood coatings, they will create a harmonious concert in your garden.
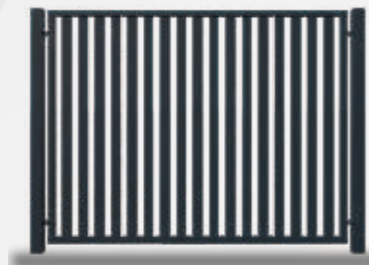

LARGE SELECTION OF DESIGNS

Vertical infill

■Vertical infill

profile dimensions: 80 x 80 mm   recommended distance: 80 mm

▪BLADE aluminum fence based on PRIME ALUMINUM SYSTEM profiles is a new product in the offer. It is characterized by a modernist style, in which the vertical profiles rising "from the ground" guarantee an appropriate level of privacy while maintaining light and air flow. It is a perfect choice for people looking for modern, functional and aesthetic solutions for their property.
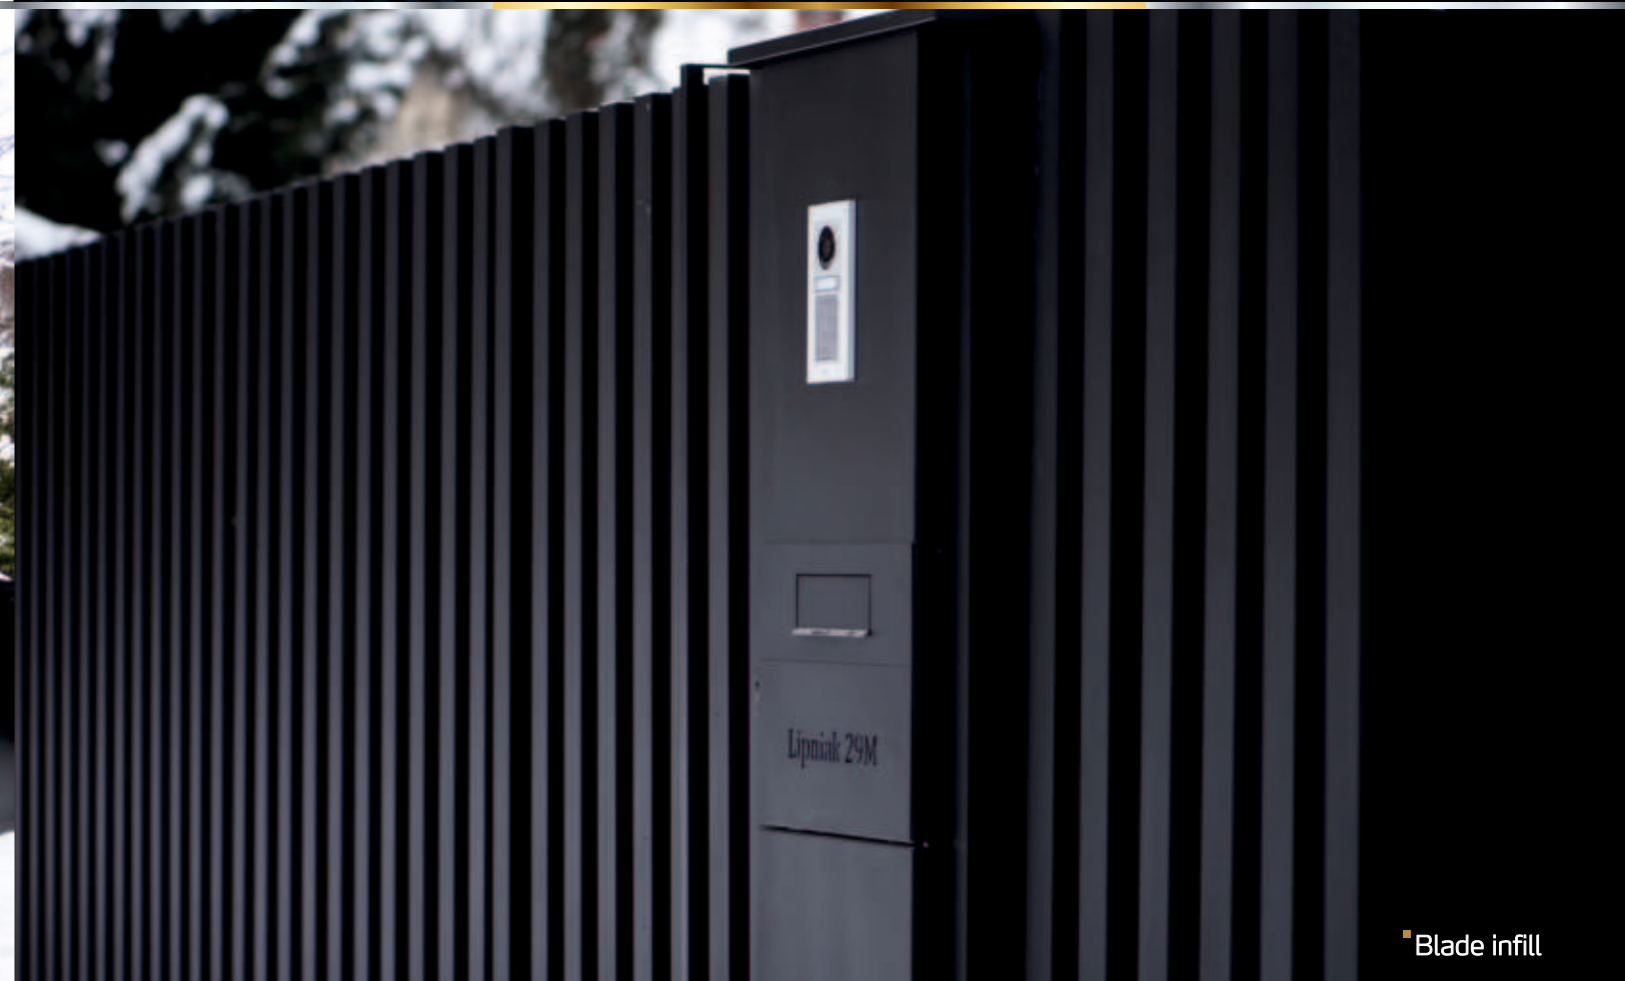

▪Blade infill

Blade infill

profile height: 90 mm   recommended distance: 10 mm

The CURTAIN filling is an original design that looks like blinds in appearance and layout. Its main advantage is functionality - it hides the property from the outside, leaving visibility from the inside, without closing the air flow. Thanks to this, the user can enjoy their garden and private space without worrying about curious pedestrians. By mixing different types of colours, you can obtain a modern and original design that will remain in perfect condition for many years.

Multimedia post

WHY CHOOSE OUR PRODUCT?

☺ made of aluminum,

☺ mailbox made of stainless steel or aluminum,

☺ illuminated property number made of stainless steel or aluminum,

☺ personalization possibility (adding a street number, residents names or other information),

☺ possibility of ordering in a version with a hole for any customer intercom or without a hole for an intercom for possible later self-production,

☺ posts included in the set allow for direct attachment of a gate, wicket or segment as in the case of a standard fence post,

☺ possibility of equipping the post with an electronically controlled parcel box,

☺ powder coated in any color from the RAL palette.

Mailbox post

Garbage enclosure

WHY CHOOSE OUR PRODUCT?

- 👍 made of aluminum,

- 👍 mailbox made of stainless steel or aluminum,

- 👍 property number made of stainless steel or aluminum,

- 👍 personalization possibility (adding a street number, residents names or other information),

- 👍 possibility of integration into the fence line,

- 👍 basic version (without intercom) does not require electrical power,

- 👍 possibility of equipping the post with an electronically controlled parcel box,

- 👍 powder coated in any color from the RAL palette.

WHY CHOOSE OUR PRODUCT?

- 👍 solid, made entirely of aluminium,

- 👍 available for any number of bins with a capacity of 120l and 240l,

- 👍 top flap equipped with gas springs supporting opening with a contactless opening system of the lid of the selected bin,

- 👍 doors equipped with locks,

- 👍 possibility of levelling on feets,

- 👍 durable and strong construction, very easy to assemble and expand,

- 👍 possibility of personalising the housing design according to the customer's preferences with the possibility of matching it to the fence design,

- 👍 powder coated in any colour from the RAL palette with the possibility of using fillings in a wood-like decor.

WHY CHOOSE OUR PRODUCT?

- made of solid aluminum profiles,
- energy-saving LED lighting,
- possibility of connecting a motion sensor, twilight sensor and astronomical clock,
- possibility of fitting a multimedia post and a parcel box,
- possibility of personalizing the filling according to the customer's preferences or matching the fence pattern,
- possibility of fitting into the fence line or mounting directly to the building,
- weather resistant,
- powder-coated in any color from the RAL palette.

WHY CHOOSE OUR PRODUCT?

- made of solid aluminum profiles,
- energy-saving LED lighting,
- possibility of connecting a motion sensor, twilight sensor and astronomical clock,
- possibility of fitting lighting into fence elements or making standalone elements,
- electronic components hidden inside the fence structure,
- possibility of making a personalized design according to the customer's preferences,
- weatherproof,
- powder-coated in any color from the RAL palette.
